

PRESS RELEASE – July 14th, 2011

Radco Industries, Inc. granted QPL approval for MIL-PRF-6085

La Fox, IL- Radco Industries, Inc. is pleased to introduce Radcolube® 6085 to their high performance fluid line of products. Radcolube® 6085, which meets military specification MIL-PRF-6085 was granted approval in the Qualified Products Database (QPD) and a Qualified Product Listing (QPL) on July 13th, 2011 by The Air Force Petroleum Agency (AFPA/PTPT) of Wright Patterson Air Force Base in Ohio.

Radco Industries, Inc. manufactures an extensive line of products ranging from fire resistant hydraulic fluids, coolant fluids and lubricating oils which they supply to the United States Department of Defense and other government agencies.

“Qualification of Radcolube® 6085 demonstrates Radco’s unwavering commitment to quality and to chemical technology. Our entire Radco team is proud to support our military by not only meeting, but continually exceeding the most stringent quality requirements,” said Stephanie Kotsios, Radco’s Military Sales Manager.

Radcolube® 6085 is a lubricating oil that is used in various instruments of aircraft, and electronic equipment. It is specialized because it is designed for use where a low evaporation oil is required in both high and low temperature applications. It also offers oxidation and corrosion resistance. It will be available immediately.
