***Re: Compliance Inspection Results
Used Oil Processor Regulations
Radco Industries, Inc.
August Mack Project Number JB041.10***

Dear Mr. Damiani:

August Mack Environmental, Inc. (August Mack) has completed the environmental compliance audit of the Radco Industries, Inc. (Radco) facility located at 39W930 Midan Drive in LaFox Illinois. The purpose of the audit was to identify applicable environmental compliance requirements and the compliance status of the Radco facility with respect to the Used Oil Processor requirements of the United States Environmental Protection Agency (USEPA) and Illinois Environmental Protection Agency (IEPA) found in 40CFR 279 and 35 III 739. The activities included performing an onsite audit of facility operations, reviewing facility records, reviewing regulatory requirements, determining the compliance status of the facility and conducting a compliance inspection.

August Mack conducted the compliance inspection on May 1st, 2001. We have determined, based on conditions at the time of this inspection, that Radco appears to be in compliance with the applicable requirements of 40 CFR 279 and 35 111 739 for Used Oil Processors.

If you have any questions or comments, please do not hesitate to contact us at (317) 5797400.

Sincerely,

A handwritten signature in cursive script that reads "Ann Bersbach".
